I AM

I sit in the castles of business and at the hearthstones
of many homes, mighty in my power to serve.

Through me is the power to make people talk with intel-
ligence concerning their communities.

With extended hand I guide the wearied traveler, and
to others shorten the distances between destinations.

In me abides the essence of democracy, as side by side
is found all nationalities, rich and poor alike.

With uncanny certainty I unite long-lost friends and make
glad the missing heirs.

Through me are protected the law-abiding by tracing the
criminal to his hiding place.

Through me, in the friendliest way, new trade channels
are opened.

I am the key that unlocks the gate to what your com-
munity is, for all who would pass its portals.

FISHING IN THE RIGHT SPOT?

Have you ever noticed a dejected fisherman sitting for hours, without even a nibble — and the small boy fifty feet away pulling in the big ones?

It's just a case of fishing in the right spot. The directory is the right spot for your advertising — it will produce the results — the big ones.

ADVERTISERS WHO KNOW

That which makes any advertiser's approval worth while is the prominence he has attained in his particular line of work.

The advertisers in the *Directory* are competent judges on the subject of advertising mediums — the fact that they approve of *Directory* advertising is evidenced by their continued patronage.

THE SHORTEST DISTANCE BETWEEN
TWO POINTS IS
● ————— A STRAIGHT LINE ————— ●

Your City Directory is the Straight Line medium to bring Your Merchandise and Your Services direct to the buyer.

. . .

There is no running around in circles before finding the commodity or service the buyer wants to purchase.

. . .

The Buyers Guide and the detailed listings in your City Directory form the STRAIGHT LINE to your needs.

LIKE TO "STRIKE OIL"?

"The good old gusher days, three strikes didn't mean 'out' — it meant success.

You can "strike oil" without leaving your desk — use the directory for better advertising coverage — and make a strike.

THE OLD "SQUARE RIG" DAYS ARE GONE!

The old square rig days meant proper trimming of sails and the correct tack — otherwise disaster. Get rid of your "square rig" advertising — try the Directory — referred to by thousands, your ad will stay on its course.

In Sight--Out of Mind In Business

The persistence of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the background and forgotten if not persistently advertised.

The City Directory is the natural medium for keeping a business or product name in the spotlight. Insist on being well represented in its pages.

Your City Directory has HUNDREDS OF USES AND APPLICATIONS

BUYING

- Learning new sources of supply
- Keeping up with known sources of supply
- Checking on the record of firms from which you buy as to dependability, stability, etc.

SELLING *(Including market analyses and sales promotion)*

- Locating new markets.
- Maintaining up-to-date mailing lists
- Analyzing the buying power of a community or street.
- Routing salesmen to avoid lost motion in reaching prospects.
- Locating residents of hotels and apartment buildings, many of whom are listed nowhere else.
- Identifying names and titles of officials, for use of salesmen.

CREDIT REFERENCE *(and Collections)*

- Running down delinquent debts.
- Checking credit applications as to address, moving habits, names of employers, stability of employment, family status, neighbors, whether owner or renter, etc.
- Identifying persons of same or similar names.
- Investigating cases in welfare, charitable, social service and legal work.

DELIVERY *Communication, Mailing, Etc*

- Routing deliveries.
- Reducing dead letters and insuring more complete delivery of mail.
- Effecting delivery of messages and parcels erroneously or defectively addressed.
- Correcting names and titles.

LAW ENFORCEMENT *Criminal Detection and Apprehension*

- Tripping bad-check passers.
- Deciphering illegible signatures.
- Guarding against habitual bill dodgers.
- Tracing heirs and witnesses, settling estates, and establishing facts as of a certain date.

1. In a 1994 study, researchers found that the average number of hours per week that men and women spend on household chores is 15.5 and 18.5, respectively. The standard deviation for men is 3.5 and for women is 4.5. Assume that the distribution of hours spent on household chores is normal. Find the probability that a randomly selected man spends more than 20 hours per week on household chores.

THE STUDY

SUMMARY

Two studies were conducted to examine the effects of a 12-week, low-intensity, supervised walking program on the health-related quality of life of older adults. In the first study, 100 older adults (mean age = 71.5 years) were randomly assigned to either a walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 100 older adults who did not participate in the walking program. The results of the first study showed that the walking program had a significant positive effect on the health-related quality of life of the older adults. In the second study, 100 older adults (mean age = 71.5 years) were randomly assigned to either a walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 100 older adults who did not participate in the walking program. The results of the second study showed that the walking program had a significant positive effect on the health-related quality of life of the older adults.

Detailed description of Figure 1: The graph plots the logarithm of the rate of polymerization ($\log R_p$) against the logarithm of the inhibitor concentration ($\log [\text{inhibitor}]$). The x-axis has major ticks at 0, 2, 4, 6, and 8. The y-axis has major ticks at 0, 1, 2, 3, and 4. Four data series are shown for different monomer concentrations $[M]$: 0.05 (open circles), 0.02 (open triangles), 0.01 (open squares), and 0.005 (filled circles). The lines for $[M] = 0.05$ and 0.02 are relatively flat at low inhibitor concentrations but show a sharp downward slope starting around $\log [\text{inhibitor}] = 4$. The lines for $[M] = 0.01$ and 0.005 show a more gradual, linear decrease across the entire range of inhibitor concentrations.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices.

One of the key initiatives in the public sector is the introduction of competition. This has led to a number of public sector organisations being privatised, and to a number of public sector organisations being required to compete for contracts. This has led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

Another key initiative in the public sector is the restructuring of public sector organisations. This has led to a number of public sector organisations being merged, and to a number of public sector organisations being reorganised. This has led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

A third key initiative in the public sector is the introduction of new management practices. This has led to a number of public sector organisations being required to adopt new management practices, and to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

These initiatives have led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service. This has led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

These initiatives have led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service. This has led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

These initiatives have led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service. This has led to a number of public sector organisations being required to improve their efficiency, and to a number of public sector organisations being required to improve their quality of service.

Service to clients and community has been a watchword at National State Bank of Newark for 145 years. There is no banking or trust problem that this bank has not handled—invariably to the satisfaction of the customer.

Your banking problem, business or personal, will find a solution here. You will receive courtesy and consideration, and your problem will be handled with dispatch—the result of our long experience in banking.

Accounts, large and small, receive the same attention. Eighteen offices in Essex County conveniently serve residents and business firms, each office being staffed to handle every type of banking and trust service.

The industrial growth of the Port Newark, South Newark and Airport areas of Newark has created a need for a strong bank to serve business, industry and individuals in these areas.

This long-felt want is now met by National State's offices at the Newark Airport, in Port Newark and in South Newark.

Industrial, seaport and airport firms and their personnel will find every convenience at these offices to meet their banking requirements. Drive-in or parking facilities enable customers to save time. Night depositories are provided for those who cannot conveniently bank during regular banking hours.

NEWARK NUMERICAL DIRECTORY

EXPLANATORY NOTES

The streets are arranged alphabetically with their descriptions, each description followed by a numerical array of householders, places of business and street accommodations. Arranged by relation where no question is suggested.

The abbreviation "R" between the street number and the name signifies "rear."

The word "transit" after a number signifies that the house, office or store at that number was vacant when the directory was made.

☎ Indicates telephone of this number.

*Right odd after street description indicates odd numbers on right side of street.

The symbol @ following a householder's name indicates that information has been received during the canvass that the house is owned by some member of the family, but as the publishers cannot and do not guarantee the correctness of the information furnished, nor the complete absence of mistakes, no responsibility for errors can be so assumed, nor can the publishers furnish further information than that shown.

Abstract

The purpose of this study was to investigate the effect of a 10-week training program on the physical fitness of sedentary individuals. The subjects were divided into two groups: a control group and an experimental group. The experimental group underwent a supervised exercise program consisting of aerobic and strength training. Physical fitness was assessed at baseline and after 10 weeks using various tests including heart rate, blood pressure, and body composition. Results showed significant improvements in cardiovascular health and muscle mass in the experimental group compared to the control group.

Keywords: Exercise, Fitness, Sedentary Lifestyle, Cardiovascular Health, Muscle Mass.
